HABITAT SPACE CREATORS.

HABITAT SPACE CREATORS.

SPACE CREATORS.

We are retail space-creators—where concept, craft and creation come together in the *HABI-LAB* to create retail environments that are designed to evolve, built to perform, and made for the real world.

Welcome

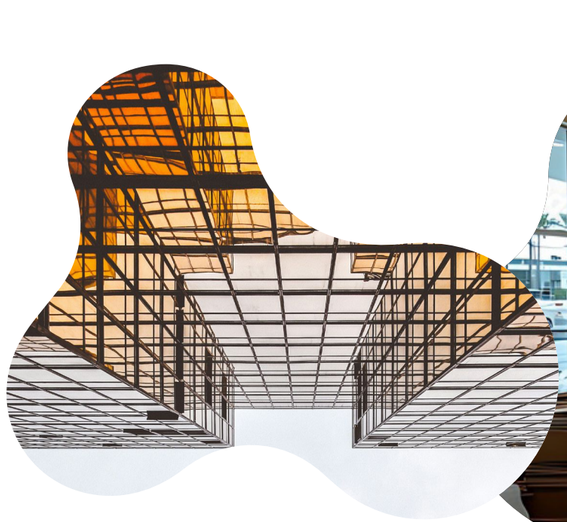

HABITAT SPACE CREATORS.

Retail Experts
Space-Creation Partner

HABITAT LAB is a multi-disciplinary space-creation partner working across retail, commercial, hospitality, —bringing together ideas, technical expertise, craft, and real-world understanding to create spaces that work. Over the years, we have built trusted relationships with leading organisations across retail, corporate, hospitality, banking, government, and high-security sectors—creating environments that are reliable, functional, and designed to perform in everyday use.

HABITAT SPACE CREATORS.

HABITAT SPACE CREATORS.

We create turnkey environments across retail, commercial and hospitality spaces—bringing brand, function and operational requirements together within one integrated habitat. Every environment is considered around the people who will inhabit it—how they enter, move, interact, work, shop and experience the brand.

Our Craft

Architecture & Design

We approach architecture and design as the foundation of every space we create. Through thoughtful planning, spatial understanding, and design intent, we shape environments that support movement, experience, and real-world use. From early-stage concept development to detailed design execution, our work ensures that every space is not only visually aligned to the brand, but built to function seamlessly in practice.

Civils

Our civil works provide the groundwork that enables every environment to perform reliably. From site preparation to structural readiness, we deliver solutions that are precise, compliant, and built for long-term stability. Every stage is executed with care and coordination, ensuring that the spaces we create are supported by a strong and dependable foundation.

Electrical

We design and deliver electrical systems that power performance and ensure operational continuity. From core installations to advanced automation, our solutions are built to support efficiency, safety, and seamless day-to-day functionality. Each system is carefully integrated into the environment, ensuring it works reliably under the demands of real-world use.

Shopfitting

Our shopfitting solutions bring spaces to life—translating concept into environments that are functional, engaging, and built for everyday performance. From full retail fit-outs to custom installations, we create spaces that support customer experience, enable brand expression, and work seamlessly within the pace of retail and commercial environments.

Furniture

We design and manufacture bespoke furniture that integrates seamlessly into the spaces we create. Each piece is crafted with attention to detail, durability, and usability—supporting both aesthetic intent and everyday function. From retail fixtures to corporate and hospitality environments, our furniture solutions are built to perform over time.

Architecture & Design

At **HABITAT LAB**, every space begins as an idea to be explored. Architecture and design is where we question, test and shape that idea—bringing together purpose, function and experience before anything is built.

Our process starts by understanding how the space needs to live in the real world. We consider movement, flow, customer interaction and operational requirements to create environments that work as intuitively as they look.

From early concept development and 3D visualisation through to detailed design, we bring spatial planning, materials, finishes and technical systems into one connected thinking process. Every element is considered in context—how it connects, how it performs and how it contributes to the complete habitat.

OUR DESIGN CAPABILITY

- Spatial planning and retail flow optimisation
- Concept development and 3D visualisation
- Store layouts and customer journey mapping
- Technical drawings and detailed design documentation
- Material, finishes and specification development
- Integration of aluminium, glass, shopfitting and structural systems
- Brand translation and environmental design

This is the LAB in HABITAT: a space for ideas, exploration and problem-solving, where creative thinking meets technical understanding.

We don’t design spaces simply to look good. We create environments that make brands tangible, make movement intuitive and make everyday retail work.

Civils & Interiors

At **HABITAT LABS**, the space has to work before it can perform. Our civils and interior enabling works create the structure, surfaces and infrastructure that make the next stage of the habitat possible.

We approach civils as part of the complete space-making process—not as isolated construction. Every floor, wall, partition, ceiling and service point is prepared with the final environment in mind, ensuring a smoother transition into fit-out, activation and everyday use.

OUR RETAIL-FOCUSED CIVILS CAPABILITY

- Site preparation and enabling works for retail environments
- Floor preparation, levelling and surface readiness
- Partitioning and drywall systems
- Ceiling installations, bulkheads and service integration
- Interior finishing, painting and surface treatments
- Trenching, drainage and infrastructure coordination
- Structural alterations and reinforcements for shopfronts and façades
- Coordination with shopfitting, electrical and integrated services teams

Within the HABI-LAB, civils is where concept begins to take physical form—creating the conditions for every other discipline to connect, align and perform.

Structured with intent. Prepared with precision. Ready for the habitat to come to life.

Electrical

At HABITAT LABS, power is part of the habitat. Our electrical systems are designed not simply to switch on a space, but to keep the entire environment connected, responsive and performing.

We approach electrical as an integrated layer of space creation—working alongside architecture, civils, shopfitting and infrastructure so that power, lighting, technology and control systems function together as one connected environment.

HABITAT SPACE CREATORS.

Within the HABI-LAB, we consider not only where power is needed, but how it supports the experience—how lighting shapes the environment, how technology connects it, and how resilient systems keep it functioning when it matters. Powered with intent. Connected by design. Built to keep your habitat performing.

OUR RETAIL-FOCUSED ELECTRICAL CAPABILITY

- Full electrical installations and system integration
- General, feature and emergency lighting solutions
- Power distribution and structured wiring
- Backup power and UPS systems for operational continuity
- Smart automation and control systems
- Data and communication cabling for connected environments
- Emergency lighting and exit systems for safety compliance
- Maintenance services and COC certification

HABITAT SPACE CREATORS.

Shopfitting

At HABITAT LABS, shopfitting is where the habitat comes to life.

It is where concept, craft and execution converge—shaping how people move through a space, how brands are experienced, and how environments perform in everyday use.

We design, manufacture, install and maintain complete furniture, fixtures and fit-outs across retail, commercial, hospitality and high-performance environments. Every element is considered as part of one connected system, ensuring that finishes, joinery, displays, services and infrastructure work together seamlessly.

Within the HABI-LAB, shopfitting is not treated as installation alone. It is the physical expression of the idea—where design becomes tangible, functional and ready for real-world interaction.

Crafted with purpose. Integrated by design.
Created to bring the habitat to life.

HABITAT SPACE CREATORS.

Shopfitting

At HABITAT LABS, every discipline is part of one connected ecosystem.

From the first idea to installation and long-term use, we bring each stage together to maintain consistency, quality and performance throughout the life of the space.

Concept design and 3D visualisation

- In-house manufacturing and custom fabrication
- Professional installation and project delivery
- Ongoing maintenance and aftercare
- Upholstery, refurbishment and renewal services

This full-circle approach a we don’t simply create the habitat and walk away. We design it, make it, install it, maintain it and help it evolve. From first thought to everyday use, everything connects.

HABITAT SPACE CREATORS.

SHOPFITTING & FIT-OUT SOLUTIONS

- Full retail fit-outs and multi-store rollouts
- High-end restaurant and hospitality environments
- Corporate interiors and workspaces
- Banking and financial environments
- Mall kiosks, retail counters and display environments
- Showrooms and exhibition spaces

HABITAT SPACE CREATORS.

Furniture

At HABITAT LABS, furniture isn't added to the habitat—it is designed as part of it. We create bespoke furniture and fixtures around the way each environment needs to look, feel and function. Every piece brings together design intent, materiality, craftsmanship and durability to become an integrated part of the space.

CUSTOM FURNITURE & FIXTURES
We manufacture bespoke furniture and fixtures tailored to each environment—combining design intent with durability and usability:

- Reception desks, counters and POS stations
- Boardroom tables and executive furniture
- Booths, banquette seating and hospitality elements
- Bar counters and serving stations
- Workstations, shelving and integrated storage
- Retail display units and racking

Designed for the space. Crafted for the experience. Made for everyday use.

INTERIOR FINISHES & DETAILING
The habitat lives in the details. From surfaces and textures to architectural features and finishing, we consider how every detail contributes to the character, experience and performance of the environment.

- Ceiling designs, bulkheads and feature elements
- Wall panelling and architectural detailing
- Commercial flooring solutions
- Integrated lighting solutions
- Bespoke joinery and millwork

Within the **HABI-LAB, materials, finishes and details are considered together—creating environments that feel intentional, cohesive and distinctly connected to the brand they represent. Every surface considered. Every detail connected.**

UPHOLSTERY & REFURBISHMENT

Our upholstery services ensure that spaces remain fresh, functional, and aligned with their intended use over time:

- Custom upholstery and material selection
- Re-upholstery and refurbishment
- Commercial-grade finishes, including leather and vinyl options

HABITAT SPACE CREATORS.

HABITAT SPACE CREATORS.

We create turnkey environments across retail, commercial and hospitality spaces—bringing brand, function and operational requirements together within one integrated habitat. Every environment is considered around the people who will inhabit it—how they enter, move, interact, work, shop and experience the brand.
